

London CareTM
Passion for Independence, Respect for Choice

The independence you desire, the care you choose

Getting older shouldn't mean that you lose control over your life or have to move away from a familiar home and community.

At London Care, we'll work with you to create a care package that provides as much or as little support as you need, so that you can carry on leading the life you choose.

We can assist with morning and bedtime routines, bathing and dressing, light housework or meal preparation. We can also help you stay involved in your community, attend religious services, clubs or groups or pursue hobbies and interests and keep in touch with family and friends, with visits, letters and emails.

Adults Over 65

More complex care includes dementia care, end of life support, medication management, managing challenging behaviour and support following a hospital stay or poor health. Regular reviews ensure that our services can meet any new requirements.

For your safety and peace of mind, our staff undergo full Criminal Records Bureau (CRB) and reference checks. They receive full induction training and are carefully supervised and monitored.

Our services include:

- support with complex health tasks
- support for people with dementia
- support for people with physical or sensory impairments
- personal care support (including washing and dressing)
- support with daily living (including employment)
- shopping
- accompanying/escorting services
- companionship services
- meal preparation
- support with medicines
- respite care
- end of life care.

Financing your care

If your care qualifies for full or part funding by your local council or NHS trust, they can commission and pay for some or all of the service we provide. Alternatively, you can control the funding yourself through a Direct Payment.

You can also pay for our service privately and we can discuss other funding options available to make sure you are choosing the best option for your circumstances.
