

London CareTM
Passion for Independence, Respect for Choice

London Care: Your care, your choice

At London Care, we understand that chronic illness can bring about major changes in your life.

Our team is experienced in providing practical support and dealing sensitively with the physical and emotional consequences of a serious or life-limiting condition.

We can assist with daily tasks like personal care, light housework, shopping and cooking and more complex requirements like managing medication, managing pain or rehabilitative support.

We know that caring for you is about more than just supporting your health, so we'll also help you to see family and friends, go to places that are important to you and do the things you enjoy. Regular reviews ensure that the support we provide can meet any new requirements.

For your safety and peace of mind, our staff undergo full Criminal Records Bureau (CRB) and reference checks. They receive full induction training and are carefully supervised and monitored.

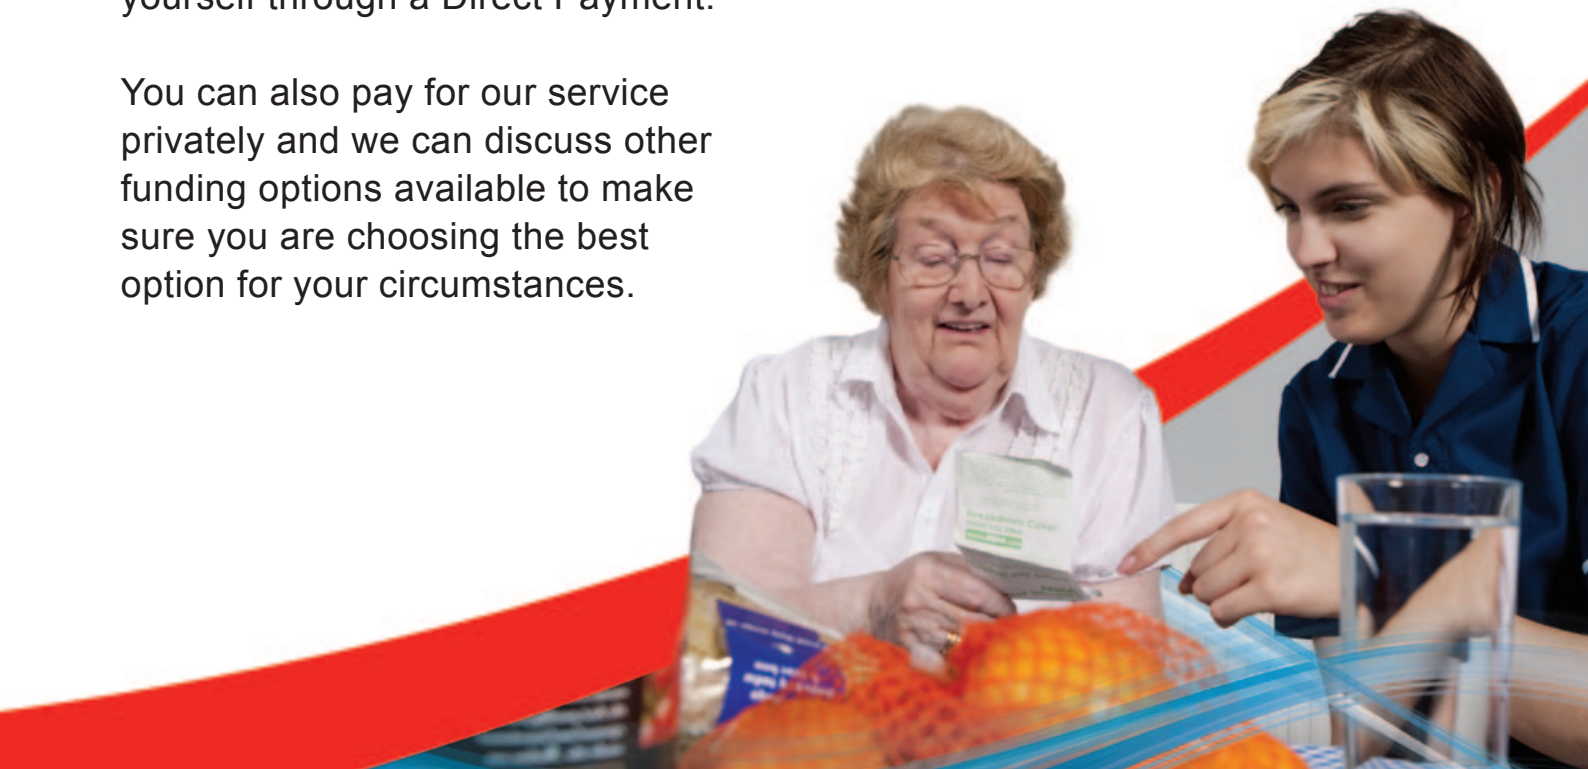

Our services include:

- befriending services
- life skills training
- meal preparation
- mobility assistance
- morning and bedtime routine
- shopping
- support with medicines
- support with complex health tasks
- support with daily living (including employment).

Financing your care

If your care qualifies for full or part funding by your local council or NHS trust, they can commission and pay for some or all of the service we provide. Alternatively, you can control the funding yourself through a Direct Payment.

You can also pay for our service privately and we can discuss other funding options available to make sure you are choosing the best option for your circumstances.
