

London Care[™]
Passion for Independence, Respect for Choice

Your life, the way you choose

Having a disability should never be a barrier to living life independently, in the way that you choose.

At London Care, we'll work with you, and the people who are important to you, to design a care package that delivers just as much support as you need, when you need it, in your home or when you are out in the community.

We can assist with tasks such as shopping, cleaning and personal care, as well as providing more complex support for long-term multiple needs, palliative care or following a hospital stay or illness.

We can also assist you in going to work, volunteering, attending education courses or taking part in leisure activities, as well as meeting family and friends. Regular reviews ensure that the support we provide will meet any new or changing requirements.

Adults with Physical/Sensory Impairment

For your safety and peace of mind, our staff undergo full Criminal Records Bureau (CRB) and reference checks. They receive full induction training and are carefully supervised and monitored.

Our services include:

- meal preparation
- mobility assistance
- morning and bedtime routines
- support with medicines
- personal care support (including washing and dressing)
- support for people with physical or sensory impairments
- support for people with acquired brain injuries
- support for people with learning disabilities
- support with daily living (including employment)
- support with complex health tasks.

Financing your care

If your care qualifies for full or part funding by your local council or NHS trust, they can commission and pay for some or all of the service we provide. Alternatively, you can control the funding yourself through a Direct Payment.

You can also pay for our service privately and we can discuss other funding options available to make sure you are choosing the best option for your circumstances.
